# ABOUT US

A leading national super brand known for its excellence in innovation and technology. Conceived back in 1972 Murphy has been built on the platform of the highest quality standards and the intent of providing world class lighting solutions. For over five decades now, Murphy, the lighting manufacturer, has been serving affordable and sustainable lighting solutions in India.

To create products that win hearts, one always has to make sure that the tools used are the right equipment needed. For that we have developed a state of art infra structural facility under the efficient guidance of our expert professional and qualified engineer with strong adherence to the quality management system.

Murphy lights have high reliability using high grade material and thereby generating high lumens led lights fixtures which are durable, energy saving and cost effective. We are committed towards satisfied customers by creating value for our products and thereby creating maximum business and minimum efforts. We Welcome you to join the journey to a bright future.

Years of Excellence

# Technology **Innovation**

Innovation is the essence of our heritage. We constantly push boundaries to create contemporary products and designs which are inspired by architectural trends & advancing technologies. The Internet Of Things (IOT) is the next industrial

revolution, and forms the backbone of smart lighting. A firm believer of this new wave of technology connecting devices, people and places, we have ventured into the domain of intelligent lighting, and are gradually making our presence felt.

# Futuristic **Manufacturing Facility**

Murphy lightings manufacturing engineers in the country work together on the latest technology platforms to develop the most optimized solution for the customer using cutting edge design software and analysis tools.

The design centre is equipped with the state-of-the-art measurement, simulation and validation facility to check the designs, prototypes, safety and protection parameters and finally, the finished products at every step, from conceptualization to delivery. Designed for Indian conditions, tested at our state-of-the-art. Now we have a modern manufacturing facility.

# LED FLOOD LIGHT

LED Flood Light is an excellent replacement for the conventional double-ended halogen-lamp floodlights. The universal mounting bracket allows wall or surface mounting tilting upwards/downwards.

## Features :

- Aluminium pressure die cast housing
- Lower payback cost
- High efficiency LED driver
- 70% energy savings compared to HPSV/MHL Luminaires

## Applications :

- Architectural and landscape Lighting
- Industrial Warehouse Lighting
- Facade Lighting
- Billboard and Advertising Lighting
- Security and Parking Area Lighting

# LED STREET LIGHT

Our LED Street Lights have been designed with a view to keep the roads safe and illuminated during the late hours of the night.

## Features :

- Elegant design
- Excellent thermal management
- Aluminium pressure die cast housing
- Lower payback cost
- High efficiency LED driver
- Low maintenance

## Applications :

- Street Lighting
- Campus and Garden Lighting
- Decorative Public Outdoor Lighting
- Parking Lots and Tunnels
- Public Area Lighting

# LED HIGH BAY LIGHT

The High Bay Light is the new reliable LED solution that is used in medium to high ceiling installation requirements, mainly in large consumer assembly areas and industrial spaces.

These lights serve as the best economical LED alternative to the conventional halide highway luminaries.

## Features :

- Elegant design
- Aluminum pressure die cast housing
- Ideal heat dissipation with good quality heat sink
- lower payback cost
- high efficiency LED driver
- Low maintenance
- 70% energy savings compared to HPSV/MHL Luminaires

## Applications :

- Heavy and light industry Production
- Assembly Lines
- Commercial Assembly Halls
- Loading Areas
- Train and Airport Station Halls
- Mall & Supermarket
- Aircraft Hangers
- Warehouse and Storage Facilities

# LIGHT CONTROL SWITCH

Our Light Control Switch light up automatically at night and off during the day with built-in a light sensor!

## Features :

- Automatically Switch On and Off
- No human Intervention
- Support Wide Range of Light Wattage
- High Sensitivity
- High Reliability
- IP 66 Waterproof

## Applications :

- Street Light
- Flood Light
- Campus and Garden Light
- Public Area Lighting

# LED K-SHAPE WALL LIGHT

A sleek and modern lighting solution designed to illuminate your space with style. With its distinctive K-shape design, this wall light adds a touch of sophistication to any environment while providing efficient and energy-saving LED illumination. Enhance your ambiance and create a welcoming atmosphere with the versatility and elegance of our LED K-Shape Wall Light.

## Features :

- Elegant design
- Aluminium pressure die cast housing
- Lower payback cost
- High efficiency LED driver
- Low maintenance

## Applications :

- Garden Area
- Landscape
- Outdoor Wall
- Facade Lighting

# LED WAYON WALL LIGHT

A contemporary lighting fixture that seamlessly blends style and functionality. With its elegant curved design, this wall light adds a modern touch to any space while providing efficient LED illumination. Enhance your ambiance and create a welcoming atmosphere with the sleek and versatile LED Curve Wall Light.

## Features :

- Curve Design
- Lens Shape Diffuser
- Aluminium Pressure die cast housing
- High efficiency LED driver
- Low maintenance

## Applications :

- Garden Area
- Landscape
- Outdoor Wall
- Facade Lighting

# LED Bulbs & Tube Lights

# LED BULBS

Resembling the traditional filament bulbs or CFL, Murphy's LED Bulbs are easy replacements for the outgoing luminaries. They fit into the same socket and hence eliminate the need of reconfiguration. Besides, these give out regular brightness at a fraction of the wattage used by the conventional bulbs.

## Features :

- Highly efficient • Longer life
- Unbreakable • Low Heating
- No Mercury

## Applications :

- Residential • Offices
- Malls • Showrooms
- Decorations

# LED VEGA PANEL LIGHT

Vega LED panel lights are in vogue the present time. These energy saving and low power consumption lights are also highly efficient than regular lighting. With the track record of excellent performance, these lights are made up of excellent light quality with the voltage of 220. They provide simple & lasting lighting solutions to the user.

## Features :

- Elegantly Design
- High brightness & illumination
- Hassle Free Installation
- Significant Energy Saving
- Glare free uniform light distribution

## Applications :

- Wardrobes
- Shelf Lighting
- Rooms
- Cabinats

# LED CV & CC DRIVER

Murphy has designed a range of LED Drivers for lighting Application. Our high quality LED Drivers are being used by leading lighting companies across the country. we have range of LED driver for AC based applications with 1W to 150W power rating

## Features :

- Precise constant current output • Auto adjustable output voltages so that any variation in LED Vf can be accommodated • Wide operating voltages • High Efficiency • Compact Size • Available in open frame & closed frames • operating temperature 0 to 50° C • Various protections : Reverse polarity, short circuit, overload, over voltage & thermal protection

## Applications :

- Strip light • Spotlight and down light fittings • Signage boards • LED panels

# MEDICAL IR LAMP

Infrared therapy is a new and innovative light-based method to treat pain and inflammation in various parts of the body. Unlike ultraviolet light, which can damage the skin, infrared light enhances cell regeneration

## Features :

- Watt: 150 w
- Voltage: 205 V
- Base: E27
- Standard Packaging: 12 Pcs.

## Applications :

- A redness of the skin may be produced. (Will fade with in a few hours)
- Relaxes the muscles and relieves tension.
- Encourages the regeneration of cells.
- Mild heating has an analgesic effect on the superficial sensory nerve endings in the skin, relieving pain.
- Increases body temperature as local heat spreads to surrounding tissues.
- Stimulates the sweat glands, improving the elimination of waste and as a result the cleansing of the skin.
- Prepares the client for further treatment.
- Nourishes the skin through the application and absorption of a product.
- Penetrates deep into the subcutaneous helping the dispersal of fatty tissue.

# IR & IRR BULB

Infrared therapy is a new and innovative light-based method to treat pain and inflammation in various parts of the body. Unlike ultraviolet light, which can damage the skin, infrared light enhances cell regeneration

## Features :

- Watt: 40W, 60W, 100W, 150W • Watt: 250W
- Voltage: 250 V • Base: E27 • Beam Spread: 30°
- Base: E-27/3-Pin • Standard Packaging: 9

## Applications :

- Metal Working: Partial heating, shrink fits, drying lacquer and paint baking.
- Plastic Working Industry: Heating prior to information of vacuum, prior to bending sheets tubes, shrinking foils, melting plastic powders for coating metals.
- Electro Technical Industry: Heating insulating-boards strips prior to cutting strips, embossing products, drying impregnated electric-motors parts windings, drying lacquer on transformer sheets windings.
- Paper Industry: Heating web on paper machines drying glue on paper sheet covered with metal plastic oil, drying coating on peper.
- Furniture Industry: Heating single component polyster on active base-coat on (veneered) chipboard.
- Packing Industry: Heating plastic shrinkin g foils drying glue on paper plastics.

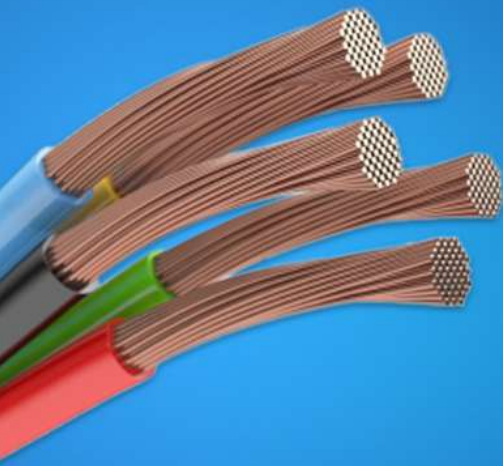

# PVC Insulated Wires & Cables

# wires

## WIRES & CABLES

murphy makes single core unsheathed Multistrand High Conductivity plain annealed copper, FR PVC insulated industrial cables in voltage grade upto and including 1100 Volts, as per IS : 694

### Features :

- 99.97% Pure Copper
- Anti Termite - Anti Rodent
- Flame Retardant
- Superior Flexibility

### Applications :

- Industrial
- Domestic

IS: 694  
  
CM/L-3128041

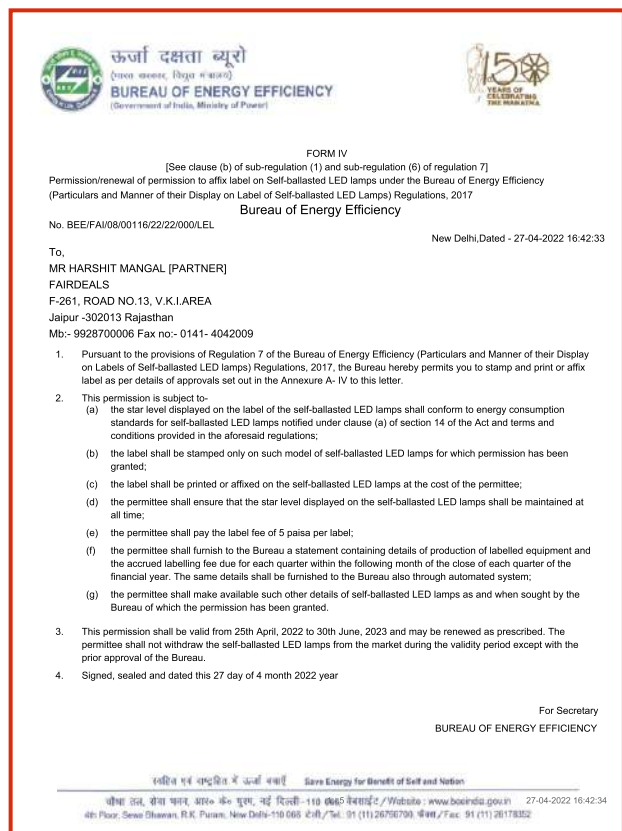

Model No.	Size (Sq.mm)	Configuration	No. of Coils packed in an Outer Box
MLWC-10	0.75	10/0.3	24
